Power BI for wine agencies on ezFocus

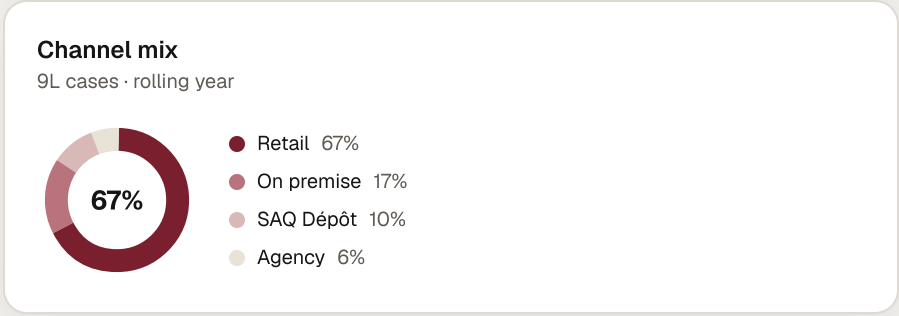

Turn your ezFocus data into decisions, not spreadsheets

Power BI dashboards and supplier reports built on the sales you already track in ezFocus. They refresh on their own, so your team stops rebuilding them every month.

hello@matromano.com

A typical month-end, today

01 Export depletions from ezFocus	x 1 per supplier
02 Paste into the master workbook	fix the formats
03 Rebuild pivots & charts	again
04 Check the totals don't match	find out why
05 Make a deck for each producer	send, repeat

The challenge

Your data is rich. Your reports shouldn’t take a week.

- Days lost every month to exports, pasting and pivot tables
- Meetings spent arguing about which number is right
- Producers kept waiting for answers about their own wines

Built around the data you already keep in ezFocus

Ranked tables. Suppliers, brands, wine countries or segments ranked across the whole market, with the supplier you're reviewing highlighted.

How we work

Designed to be simple, built to perform

Independent, specialised in wine agencies, and already fluent in ezFocus. No generic templates.

01

Understand your reporting

What you build by hand today, and what suppliers ask for.

02

Connect & model

Power BI reads your ezFocus data, shaped around how agencies sell.

03

Design for clarity

Every page understood in seconds, not decoded.

04

Adoption by your team

Walkthroughs and documentation, so the dashboards get used.

Free 30-minute call

What if your data finally became a decision tool?
